FUSION CQM

CORE MEASURE REPORTING

You already know that your organization provides quality healthcare. Documenting and gathering metrics to detail the quality healthcare you provide is required for you to optimize your reimbursement from CMS and meet accreditation standards with JCAHO. Value-based purchasing initiatives will continue to expand and demand more time and focus from your quality staff for many years to come. Fusion CQM is designed to provide you with the expert tools you need to help document, gather and report on quality objectives.

Dolbey has designed Fusion CQM™ as a browser based, intuitive tool that requires minimal integration and IT resources to implement. Your quality team can be taking advantage of the powerful tools on day one. With options for automatic abstraction, Fusion CQM+™ adds speed, accuracy and automation to the entire quality reporting process for peak team performance.

FUSION CQM+

AUTOMATE QUALITY INITIATIVES

SMART WORKFLOW

Fusion CQM+ can analyze documents in real-time to identify patient charts that fall into a measured population. This streamlines staff effort and eliminates valuable time spent manually reviewing documentation. Let Fusion CQM+ track your documentation progress while patients are still receiving care to provide meaningful feedback that focuses on improving patient care. Fusion CQM is mindful of your quarterly reporting requirements and provides daily and weekly goals of charts that require review to end each quarter with enough charts to meet the reporting requirements.

- Eliminate manual effort in monitoring and meeting reporting requirements
- Automatically and concurrently identify qualifying charts for review
- Skip logic eliminates unnecessary quality abstraction and saves time
- Dashboards provide real-time progress toward quarterly goals
- Skills based routing sends charts for review to the staff best skilled by measure set
- Electronic submission to both CMS and JCAHO

OPTIONAL AUTOMATIC LANGUAGE PROCESSING

Fusion CQM+™ adds the exclusive power of healthcare tuned Natural Language Processing (NLP) technology which is capable of scanning your electronic health record to identify relevant diagnostic events that require the quality team's review. Fusion CQM+ can aid in offering suggested answers within a measure set for validation by your quality staff.

ENABLE CONCURRENT QUALITY REVIEWS

Retrospective quality reviews can only serve to identify missed opportunities in charting or care routines. Fusion CQM+ can perform concurrent reviews which can alert you to opportunities to fix documentation for quality metrics that may have been met but not properly documented. While the patient is still receiving care, Fusion CQM+ will evaluate documentation to determine if they will become part of a measure set population. Quality staff now has the ability to alert the care teams of documentation requirements before the patient is discharged.

Concurrent review also provides the opportunity to be proactive in educating staff regarding problems that have historically been trouble spots in either care protocols or documentation habits. As soon as a diagnosis is documented in a patient chart, Fusion CQM+, using NLP, will “read” and report the case to your quality staff to provide hands-on guidance to ensure that metrics are not missed.

DOLBEY

Since 1914, Dolbey has delivered timely solutions with an emphasis on customer satisfaction. Our expert solutions, coupled with 24 hour support, make Dolbey the company to turn to for your fast changing requirements.

DICTATION, TRANSCRIPTION, SPEECH, QUALITY & CODING SOLUTIONS

FUSION SUITE™

Fusion is a healthcare software solution designed to deliver modular digital dictation, transcription, document management, speech recognition, coding and core measures in a single, integrated solution.

Designed for departmental or enterprise-wide deployment, Fusion is the healthcare solution that delivers improved productivity in an end-to-end solution.
