

Winscribe Professional Mobility Suite

Winscribe Dictation for Android™, iPhone® & BlackBerry®

In today's environment, it is highly important that an organization's staff have the ability to be totally mobile while still having access to their core business applications, such as internet, e-mail and dictation. With this in mind, Winscribe has developed the Winscribe Professional Mobility Suite, which offers a sleek interface for dictating on iPhone, iPad, Android and BlackBerry devices.

Dictation via mobile devices grants both flexibility and convenience to mobile staff members with the functionality of a handheld recorder. Not only do these applications enable professionals to instantly transfer dictations to typists or transcription staff while on the go, they also enable organizations who have already embraced mobility to deploy an advanced workflow system without incurring additional hardware costs. Far from being a glorified note taker, the Winscribe solution provides professionals with full dictation functionality, including insert, over-write and job type selection. As well as being easy to use, these solutions are secure and meet the requirements for secure client data protection.

Full Workflow Integration

Winscribe Professional has been designed to integrate with Winscribe's digital dictation workflow system, enabling users to send dictations securely from anywhere and monitor the progress of the transcription process. With options to route work directly to a secretary or transcription team you have the power of choice in your hand. Dictations can be uploaded anywhere, anytime with client demographics attached ensuring document accuracy and accelerating the transcription process.

Streamlined Workload

Winscribe Professional communicates directly with the Winscribe server, and dictations are immediately sent to transcription staff when an internet connection is present.* This means that wherever your authors are, dictations are instantly made available to transcription staff, allowing for a more streamlined workload without peaks and troughs.

* *When a connection is not present, dictations are saved to the local device or flash memory card and sent promptly when a connection is restored.*

Secure Voice and Data Transmission

Winscribe's mobile applications allow dictations to be sent directly to a Winscribe server through a secure HTTPS transmission to meet the requirements for secure client data transmission.

Faster Document Turnaround through Optional Speech Recognition Integration

Winscribe's mobile applications record using high quality audio suitable for use with Winscribe's server based speech recognition solution. Authors are free to dictate anywhere, anytime and have their dictation automatically routed for server-side recognition. This optional functionality further improves document turnaround time.

Models Supported

Android Smartphones & Tablets

Winscribe Professional for Android supports Android-powered smartphones running v.1.6 or higher. In addition, Winscribe's Android app can be downloaded from Google Play store onto the latest tablet devices like Google Nexus and Samsung Galaxy Tab. A Secure Digital (SD) card must be used with the Android device.

iOS (iPhone, iPad and iPod Touch) Devices

Winscribe Professional for iOS supports devices running iOS v.3.1.3 and above, including:

- iPhone 3G and 3GS
- iPhone 4 and 4S
- iPhone 5, 5C and 5S
- iPhone 6 and 6 Plus
- iPod touch (requires a microphone & headset)
- iPad, iPad 2 and iPad mini

BlackBerry Smartphones

Winscribe Professional for BlackBerry supports:

- BlackBerry Z10, Z30, and Q10
- BlackBerry software Version 10 or higher

Innovative Features:

- Record and send dictations immediately (or send from drafts once dictation is completed)
- Online/Offline functionality
- Insert/Overwrite
- Select the quality of audio recordings
- Bluetooth functionality
- Prioritize dictations
- Save to drafts folder
- View job progress and set the required by date for jobs
- Tablet support
- Secure data transmission via HTTPS over wifi, 3G, 4G or LTE connections
- Full integration with Winscribe Dictation, a digital dictation workflow management system
- Access to speech-recognized text and fully formatted documents via your tablet or smartphone (requires speech recognition add-on)
